

HEALTH OF THE CHILDREN OF THE WORLD. THEY NEED OUR HELP !

Mortality rate of children in certain regions, especially **Sub-Saharan Africa**, is still alarming.

CHILDREN (5-9 YEARS OLD) MORTALITY RATE, 2019

Sanitary conditions play a vital role in preventing the spread of communicable diseases among children

Sufficient physical activity reduces various health risks and has a positive effect on overall wellbeing

There is a noticeable gap in access to basic hygiene, sanitation and water services between schools of **least developed regions** and the **world**

ACCESS TO BASIC HEALTH SERVICES AT SCHOOLS

Sources: UNICEF. Datasets. data.unicef.org
WHO. Data. www.who.int/data/

Adolescents from all over the world are not sufficiently active with **Eastern Mediterranean** region leading the chart.

PREVALENCE OF INSUFFICIENT PHYSICAL ACTIVITY BY REGION

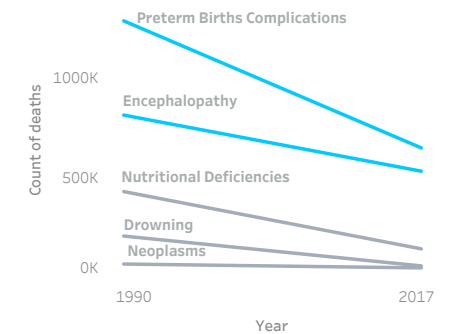

Still concerning

Causes of deaths of children under 5, 1990-2017

DEATHS BY INFECTIOUS DISEASES

NON-INFECTIOUS CAUSES OF DEATHS

Medium positive correlation is indicative of a pattern where as prevalence of insufficient physical activity increases the obesity prevalence increases as well.

INSUFFICIENT ACTIVITY VS OBESITY IN ADOLESCENTS
